

COME HELP THE TOWN PLAN FOR FUTURE IMPROVEMENTS TO CHEVERLY TOWN PARK

Back in 2013, the Town prepared a Cheverly Town Park Master Plan that identified improvements needed in the park. Our planning efforts recently received a boost. The Low Impact Development Center (LID Center), which is a non-profit based in Beltsville, MD, received grant funding from the National Fish and Wildlife Foundation to conduct preliminary engineering investigations to better locate desired site improvements and stormwater management opportunities and bring the area up to 2010 ADA Standards for Accessible Design. The Town intends to use this information to seek additional grant opportunities for final design and construction funds.

The project was kicked off in February at a meeting with the Town's Green Infrastructure Committee and will end in September. Make sure to have your voice heard by taking this [Town Park User Survey](#). More information on this project can be found online by visiting the [LID Center's website](#). The LID Center will be providing a project update. The next Green Infrastructure Committee meeting will be Monday, May 4 at 7:30 p.m. Join the [Zoom Meeting here](#). The meeting ID is 937 6459 1137. The password is 644838. You may also telephone into the meet at 1-301-715-8592. The call-in meeting ID is 937 6459 1137.

WE WANT YOUR INPUT

Help us conceptualize how to integrate stormwater management into Cheverly Town Park while serving the social and recreational needs of our residents. Visit the *Low Impact Development Center's* website:
